
Many men go fishing all of their lives without knowing that it is not fish they are after.

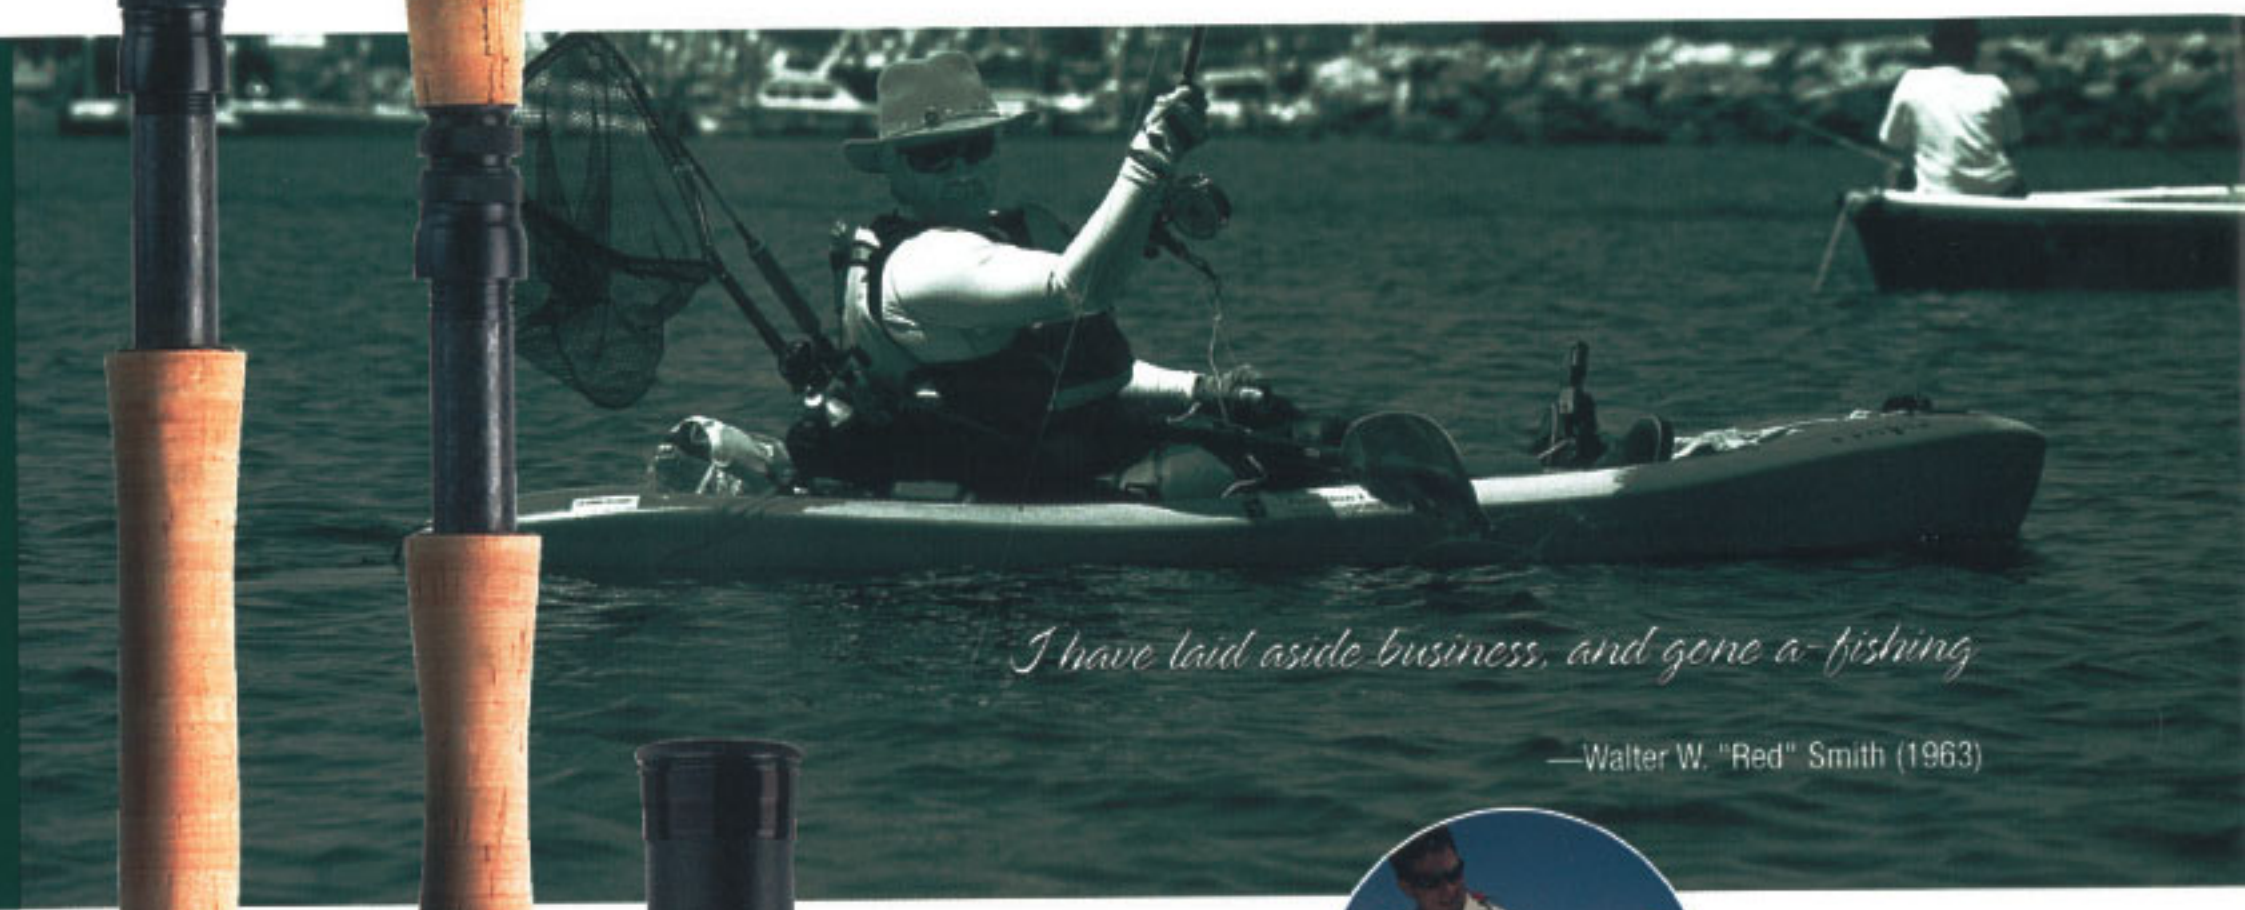
— Henry David Thoreau

NANO TITANIUM

NTi

These are the highest modulus fast action rods ever made. You can draw pencil thin lines in the air and control the fly line as never before. Reinforced this year with our proprietary carbon scrim for toughness, these rods set the standard for short or long fishing. Nitrate carbon stripper guides, Titanium nitrate single foot snake guides, the best Flor grade cork handles. These are the action.

REDINGTON RODS



I have laid aside business, and gone a-fishing

—Walter W. "Red" Smith (1963)

RFX SERIES

This series of spin and casting rods has been designed by a project group here at Redington headed by Fred Contaoi. Fred has mastered catching fish and he catches them the best way he can. Often, that means he has to lay his fly rods down and use conventional gear. Freddie is not an easy guy to please and frankly, some times he has left us behind while designing this series. This is his and many others good work. The actions are accurate for the line and lure weights and after a year of selling, our biggest problem is to build them fast enough.

REDINGTON RODS

This day was fine—
not another hook
in the brook.

— Daniel Webster (c.1835)

GD SERIES

- Our best selling reel
- Machined 6061 barstock aluminum
- Stainless gear drag mechanism
- Cork drag washer
- Mid arbor for high capacity and quick line pick up
- Available in anodized silver or black

CT SERIES

- Classic trout styling
- Maximum venting for low weight
- Anodized silver or black

Also available in silver

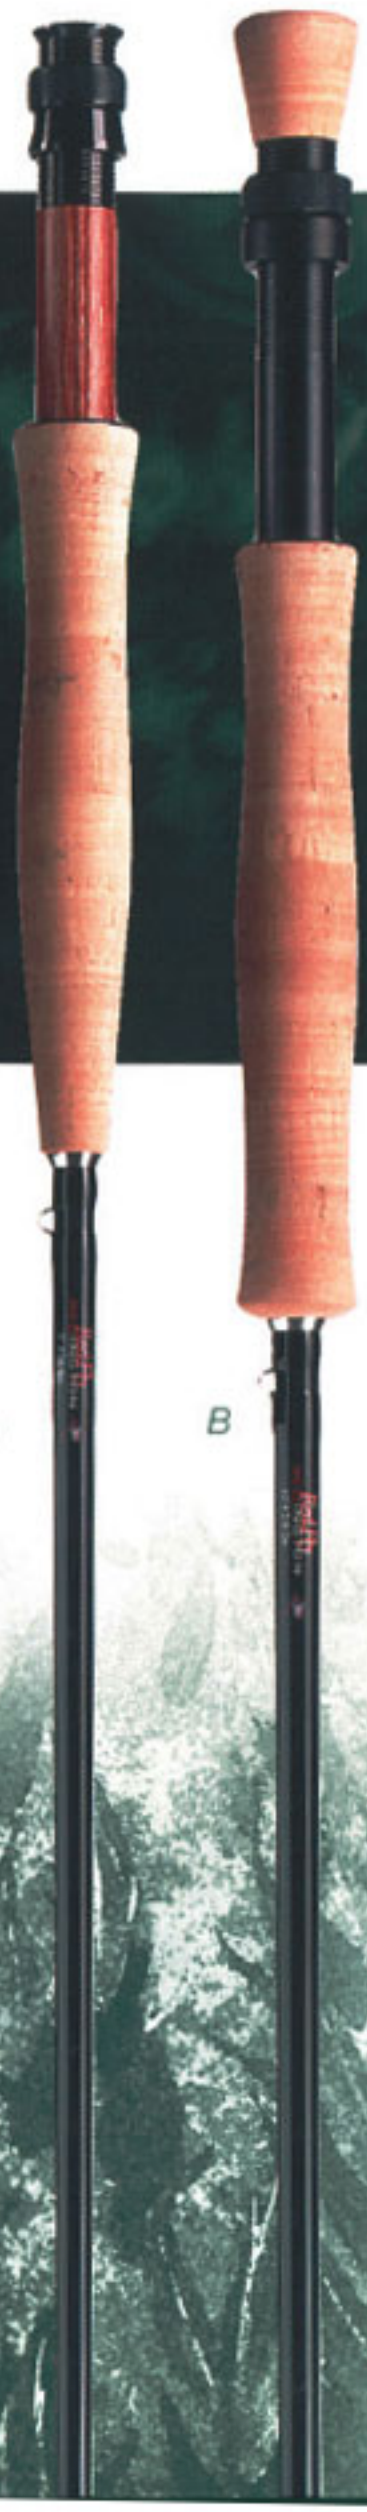
RED.FLY SERIES

This extensive rod line is the best definition of what Redington is all about. These rods are sold in 26 countries and include every possible model, from the 11' 3" #7 for the Irish Loch fishermen to bush beaters 7'6" #3 in the High Sierras. We brought real performance to the most accessible price point so beginners could buy a rod they would use all their life, or an expert could buy for an incidental fishery and a new opportunity to fish.

REDINGTON **RODS**



A visit to a first-class fishing-tackle shop is more interesting than an afternoon at the circus.

— Theodore Gordon (1906)

A B

The Red.Fly outfits are the go-to tackle for a quick reliable pick up on the way to the water or for a gift. These rods carry our name around the world and you're very likely to find some right in your own back yard.

RS² SERIES

We have upgraded and expanded this series to meet any fishing requirement. The beautiful fit and finish and the high quality components of this series makes a clean reliable tool that will last you a lifetime. Each rod is sold with a tube for protection. The RS2 outfits are the broadest series of fresh and saltwater rods available today. Packed in a rod and reel case, our acclaimed GD barstock reel, flyline and leader, they are beautifully balanced.

REDINGTON

RODS

Outfits include a GD reel (also available in matte black), knotless leader, Weight-forward Floating FlyLine, 20# backing, rod and case.

When the world changed these rods had just been introduced. We all needed a five or seven piece rod we could carry on the plane and these did the job at 1/3 of the price of any quality multi-piece rods. They have the strongest reviews in the professional fishing press. This is the best selling rod series we have ever produced. This year we have expanded the line to include some very sweet light line rods: 8' #2, 7' #3 and a 9' #3. Frankly, we didn't think it could be done in a five piece rod. We were wrong.

Wayfarer Rod Tube

DFR SERIES

This is our cult rod for the angler who has seen it all. The trimodulus construction of this rod brings ease and accuracy together, attracting the most discriminating and relaxed angler. Recommended by doctors for avoiding rotator cuff injury, or for afterwards when you won't stop fishing. These rods do it for you. These are the most beautiful rods David F. Redington (DFR) makes and he makes them every day. All three piece from #2 to a double handed 15' #10.

The high quality of writing devoted to fishing is a tribute to its values.

— James Michener (1976)

NANO TITANIUM QUARTZ NTiQ

It's been a long time since a fly rod was built of anything but carbon or fiberglass, and it's about time. Our Patent Pending prepreg offers a whole new level of confidence to the angler who prefers super light high modulus, fast action fly rods.

There is nothing familiar about these rods or the components. The slotted tight fit annodized aluminum reel seat, the recoil double foot nickel titanium snakes and our new fighting butt make these the best rods for the wild blue yonder and those feisty game fish you will find there.

Both our NTi and NTiQ have won first place for the past 2 years at the EFTTEX (European Fishing tackle trade Exhibition).

NANO TITANIUM

NTi

These are the highest modulus fast action rods ever made. You can draw pencil thin lines in the air and control the fly line as never before. Reinforced this year with our proprietary carbon scrim for toughness, these rods set the standard for short or long fishing. Nitrate carbon stripper guides, Titanium nitrate single foot snake guides, the best Flor grade cork handles. These are the action.
