INSTALLATION INSTRUCTIONS

VOLT® Landscape Lighting
VOLT® 120V Flood Light with Knuckle
VFL-400X-LI-ABZ

Help Hotline:
1-813-978-3700 • Mon-Fri 8am-8pm • Sat-Sun 10am - 6pm (EST)
**Important: Please Read Before Installation**

1. This LED Floodlight uses the latest in solid state lighting technology for long life, low maintenance, and high efficiency.
2. An internal power-factor-corrected switch mode supply allows this fixture to be used from any nominal 100V-277V, 60Hz AC supply without any variation in light output.
3. Suitable for use in:
   a. Ambient Temperatures of: -20° to +40°C (-4° to +104°F)
   a. Wet Locations

Note: Save these instructions for future reference.

**Important Safety Instructions**

To avoid the risk of fire, explosion, or electric shock, this product should be installed, inspected, and maintained by a qualified electrician only, in accordance with all applicable electrical codes.

To avoid electric shock:
1. Be certain electrical power is OFF before and during installation and maintenance.
2. Luminaire must be connected to a wiring system with an equipment-grounding conductor.

To avoid explosion:
1. Make sure the supply voltage is the same as the rated luminaire voltage.
2. Do not install where the marked operating temperatures exceed the ignition temperature of the hazardous atmosphere.
3. Do not operate in ambient temperatures above those indicated on the luminaire.

For supply connections use wire rated for at least 90°C (194°F)

Warning: these luminaire should ONLY be installed by a qualified electrician.

**Install Fixture**

Pass supply wire from the fixture through the hole on the wall or J box. Attach the fixture to the wall and secure with self-tapping screws. Hand tighten until snug.

NOTE: Wall Anchors are required for brick walls or concrete walls. To determine anchor locations, place the backplate of the fixture onto your desired location and mark points from the holes on the backplate.
2 Wire Connections

Allow enough wire from the fixture for adjustment purposes. Connect wires from the fixture into the wiring terminal. The white wire goes to the “Neutral” terminal; the black wire goes to the “Live” terminal; and the green wire goes to the “Ground” terminal. Fix them in place with the connector screws.

3 Adjust Lampbody

Adjust the fixture to your desired orientation and tighten the set screw on the knuckle with a screwdriver.
After installation, please

A. Double check whether the lighting fixture is firmly fixed.
B. Double check the wires are connected correctly.

Lastly, turn on the power and check if the lighting fixture is working properly. If not, please turn off the power and contact us at 813-978-3700.
